DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Westdyk (5,360,337). Westdyk shows a mold 18 comprising a bottom portion 70 having a rear wall 66 and a sidewall 68 at a periphery thereof extending upwards to define a cavity 19; and a shaping element 16 with a spherical head 58 for forming in a dental model base a matching spherical connection for a pivot mechanism which rotationally mates with a corresponding connection element of the articulator. All of the claimed structure being shown, the intended use of the cavity that is formed in an inferential element with another inferential element is an obvious matter of choice in the intended use of the known structure with inferential elements.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to

identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-7 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-6 of prior U.S. Patent No. 6,089,863. This is a double patenting rejection. Claims 1-3 read on claims 1 and 2 of the '863 patent. Claims 1, 4 and 5 read on claims 3 and 4 of the '863 patent. Claims 6 and 7 read on claims 5 and 6 of the '863 patent.

Drawings

The drawings filed September 19, 2001 are found to be acceptable by the examiner.
